2. [redacted] Accompanied [redacted], of OSR, to a briefing of Messrs. Don Lynch, Charles Cromwell and James Woolsey, of the Senate Armed Services Committee, on the construction of the 444-B vessels at Nikolayev. [redacted] briefing was especially good and he answered some rather detailed and technical questions by the staffers flawlessly. His unclassified chart showing a comparison of the general configuration and flight deck arrangement and space of the 444-B as compared with several other carriers was particularly effective and a copy was left with the staff.
